BULLETIN OF THE MONTH

How to buy meat for your freezer
Home and Garden Bulletin No. 166

Consumers have three alternatives in buying meat for their freezer: buying a whole carcass, side, or quarter; buying wholesale cuts; or buying retail cuts. The purpose of this slightly revised bulletin is to help the consumer compare the costs under the alternatives and also to point out a number of other points such as grades, kinds of cuts, and yields of usable meat.

NOTE: Single copies of publications other than those listed FOR SALE ONLY may be obtained free as long as the supply permits from the Office of Communication, U.S. Department of Agriculture, Washington, D.C. 20250. Prices are given for the convenience of persons desiring to purchase these publications in quantities and for those who make frequent purchases of government publications. Remittance should be sent to the Superintendent of Documents, Government Printing Office, Washington, D.C. 20402, except as otherwise noted.

MICROFICHE

Potato diseases. (AH 474) 79 p., illus.

This handbook is a compilation of the major diseases and related problems of the potato. The text recommends measures for prevention and reduction of losses from these problems including the use of chemical fungicides, bactericides, and insecticides. Various potato diseases and disorders portrayed in authentic color will be of interest to student, scientist, and potato grower alike. **Available in printed copy or microfiche.**

Laboratory evaluation of compounds as repellents to cockroaches, 1953-1974. (PRR 164) 28 p.

This publication evaluates 901 compounds repellent to cockroaches including

Blattella germanica (L.), *Supella longipalpa* (F.), *Periplaneta americana* (L), and *Blatta orientalis* (L). Of 901 compounds tested, 127 repelled 94 percent of the German cockroaches, 61 repelled 100 percent of this species, and 13 repelled 100 percent of all four species tested. **Available in printed copy or microfiche.**

Annotated bibliography of the horn fly, *Haematobia irritans* (L.), including references on the buffalo fly, *H. exigua* (de Meijere), and other species belonging to the genus *Haematobia*. (M 1278) and (M 1278-Supplement 1).

This publication lists 402 references of all stages and all aspects of the biology, ecology, and control of the horn fly. References on the buffalo fly and other closely related members of the genera *Haematobia* and *Lyperosia* are included. These references supplement the list published in 1974. Both publications (1974 and Supplement 1, 1976) are **available in printed copy or microfiche.**

FARMERS' BULLETINS

Automatic feeding equipment for livestock and poultry. (F 2198) 29 p. 45¢.

This revised bulletin primarily describes various equipment for feeding systems, and includes 35 detailed illustrations. Information about planning a feeding system, and examples of how they work are also given.

HOME AND GARDEN BULLETINS

Como comprar los huevos. (G 144-S) Folder

This slight revision of the Spanish version of the How to Buy Eggs publication, which explains what the USDA grades mean and gives tips on buying and using eggs.

How to buy beef roasts. (G 146) 15 p. 35¢.

This slightly revised bulletin will help you choose beef roasts. It also describes and illustrates the many kinds of beef roasts ranging from rib roasts to arm pot roasts.

How to buy meat for your freezer. (G 166) 27 p. 45¢.

See Bulletin of the Month

How to use USDA grades in buying foods. (G 196) 15 p. 35¢.

It is hard to judge the quality of many foods in the grocery store, but USDA grades for food can help you. This revised folder shows the official shield-shaped grade marks used on foods like butter, cheese, milk, poultry, meat, and fruits and vegetables. It gives detailed descriptions of foods carrying various shields so that the buyer can know more about what they are buying.

PUBLICATIONS RECEIVED DURING JANUARY-FEBRUARY

BULLETIN OF THE MONTH

Drying foods at home
Home and Garden Bulletin No. 217

For thousands of years, people have dried many foods to preserve them for leaner times. Preserving seasonal foods by drying is still useful and convenient, and it has the added advantage of conserving storage space. This publication tells how to prepare vegetables and how to prepare and pre-treat fruits for drying. It also tells how to build a portable electric food dehydrator to preserve fruits, blanched vegetables, meats, and nuts.

NOTE: Single copies of publications other than those listed **FOR SALE ONLY** may be obtained free as long as the supply permits from the Office of Communication, U.S. Department of Agriculture, Washington, D.C. 20250. Prices are given for the convenience of persons desiring to purchase these publications in quantities and for those who make frequent purchases of government publications. Remittances should be sent to the Superintendent of Documents, Government Printing Office, Washington, D.C. 20402, except as otherwise noted.

FARMERS' BULLETINS

Feedlot and ranch equipment for beef cattle. (F 1584) 20 p. 40¢.

Equipment and housing is important to beef cattle operations, including sheds, shade shelters, windbreaks, back rubbers, cattle guards, silos, feeders, hay racks, water tanks, corrals, scales, and chutes are described and illustrated in this revised bulletin. The bulletin tells stockmen how animal handling facilities may be designed and constructed for strength, durability, and safety. Information is also given on control of runoff from feedlots.

Control of grape diseases and insects in the Eastern United States. (F 1893) 24 p.

This slightly revised bulletin describes the diseases and insects that attack muscadine and American bunch grapes and give recommendations on controlling them with fungicides and insecticides. Among the diseases discussed are black rot, downy mildew, ripe rot and bitter rot, and Pierce's disease. General recommendations for growing grapes and a spray schedule for controlling diseases and insects are included.

Establishing and managing young apple orchards. (F 1897) 26 p. 35¢.

Since their average lifespan is 40 years or less, commercial apple orchards must be systematically renewed to provide good fruit. This revised bulletin explains how to establish and manage young orchards through proper (1) selection of sites, (2) planning and planting, (3) soil management, (4) training and pruning, and (5) control of weeds, insects, and disease.

Making and preserving apple cider. (F 2125) 14 p. 35¢.

This slight revision gives information on selecting and blending the apples, grading and washing the fruit, grinding and pressing it. It also tells growers how to preserve the juice by refrigeration, freezing, pasteurization, or ultraviolet irradiation and the kind of containers to use. Information on plant design and equipment, sani-

tation, and fly control is included.

Controlling tomato diseases. (F 2200) 12 p. 35¢.

This slight revision describes diseases that most commonly attack tomatoes, such as fusarium wilt, verticillium wilt, early blight, late blight, bacterial spot, anthracnose, and root knot. Symptoms of each disease and the progress of the disease are discussed. Control measures such as planting of resistant varieties, application of fungicides, crop rotation, and soil fumigents are given. Common and chemical names of fungicides for control of tomato diseases are listed.

Sugarbeet insects: How to control them. (F 2219) 20 p. 35¢.

This revision describes the insects that attack sugarbeets, the parts of the plant they injure, and gives suggestions for both cultural and chemical control. It includes a guide to selection and use of insecticides as well as a section on beneficial insects.

Treating farmstead and rural home water systems. (F 2248) 16 p. 35¢.

This revised bulletin discusses treatment of farmstead and rural home water systems. Disinfecting, water softening, iron removal, chlorination, and other treatments make water safe for drinking and satisfactory for bathing, laundering, and other household uses. A guide is given for selecting the method of neutralizing acidity and controlling corrosion in water.

HOME AND GARDEN BULLETINS

Freezing combination main dishes. (G 40) 22 p. 35¢.

This slight revision tells how to prepare combination main dishes for freezing. It contains recipes suitable for freezing as well as tips for preparing your recipes for freezing. Recipes include poultry combination dishes, meat stews and meat pies, meat loaves, salads, and bean dishes.

Money-saving main dishes. (G 43) 48 p. 60¢.

This slight revision suggests ways to stretch food dollars by using economical foods in balanced meals. Economy of time, as well as money has been considered in the selection of dishes and menus and in the suggestions for proper management. There are recipes and suggestions for about 150 money-saving main dishes. Additional tips are given for outdoor main dishes.

Family food budgeting . . . for good meals and good nutrition. (G 94) 14 p. 35¢.

This revised bulletin gives family food plans, or budgets, at different levels of cost, and gives instructions on how to make and use a food plan for your family.

It suggests kinds and quantities of foods to buy weekly that will provide nutritionally adequate diets for family members of various sex-age groups. A section on cutting food costs is also included.

How to buy beef steaks. (G 145) 15 p. 35¢.

This slightly revised bulletin contains helpful information for consumers on how to select beef steaks by cut and by USDA grade and which cooking method to use. This bulletin is well illustrated.

Controlling the Japanese beetle. (G 159) 15 p. 45¢.

This revised bulletin describes the Japanese beetle and its habits, tells about the damage it does, discusses natural controls, control of grubs, and up-dates information on chemical control measures. It also discusses control of beetles and gives a guide for mixing sprays for fruits, vegetables, and ornamentals.

How to buy canned and frozen fruits. (G 191) 23 p. 50¢.

The convenience and quality aspects of canned and frozen fruits are introduced to the consumer in this slightly revised booklet.

Drying foods at home. (G 217) 20 p. 45¢.
See Bulletin of the Month

LEAFLETS

Dwarf fruit trees. (L 407) 8 p. 35¢.

Although dwarf trees require more care, they repay the extra care with earlier and higher production. Dwarf fruit trees utilize sunshine much better and produce better fruit. They require less space per tree than standard-size trees. This revision also tells why dwarf trees are easier to spray, prune, and harvest.

Sprinkler irrigation. (L 476) 8 p. 35¢.

This slight revision names the four parts that usually make up a sprinkler system and describes each—sprinklers, pipelines, a pumping plant, and debris-removal equipment. System design, buying and system operation, and maintenance are also discussed.

Firewood for your fireplace—selection, purchase, use. (L 559) Folder 35¢.

This slight revision explains the value of firewood compared to other fuels, where to obtain firewood, how to buy firewood, the kind of wood best suited for burning in a fireplace, how to build a better fire, and how to build a safe fire.

SLIDE SETS AND FILMSTRIPS

The following materials are available by
purchase only. Purchase slide sets from
the Photography Division, Office of Com-
munication, U.S. Department of Agricul-
ture, Washington, D.C. 20250. Order
filmstrips from Photo Lab, Inc., 3825
Georgia Ave., N.W., Washington, D.C.
20011. Narrative guides for lecture notes
accompany each.

People on the farm: Dairying. C-206. To
be released April 1977. 112 frames.
Slide set \$24.00. Filmstrip \$17.00. Price
includes cassette.

Story of an actual modern dairy opera-
tion and the daily commitment the family
which owns it has to make to keep the milk
flowing.

Energy: Use it wisely around the home.
C-199. Released 1975. 69 frames. Slide
set \$18.50.

Filmstrip \$11.50 Price includes cas-
sette.

Many handy tips on how energy used to
heat, cool, cook, and clean the home can be
used more efficiently.

PUBLICATIONS RECEIVED DURING MAY-JUNE

BULLETIN OF THE MONTH

Nutritive value of foods Home and Garden Bulletin No. 72

A table of nutritive values for household measures of commonly used foods makes up the greater part of this revised bulletin. Table 2 shows the food values of 730 commonly used foods. Nearly 200 new food items have been added, and measures and values for all foods reviewed and updated as necessary. New information is provided on the dairy products group; on the enrichment levels of white bread and rolls; and on the fatty acid content of the foods.

NOTE: Single copies of publications other than those listed FOR SALE ONLY may be obtained free as long as the supply permits from the Office of Communication, U.S. Department of Agriculture, Washington, D.C. 20250. Prices are given for the convenience of persons desiring to purchase these publications in quantities and for those who make frequent purchases of government publications. Remittance should be sent to the Superintendent of Documents, Government Printing Office, Washington, D.C. 20402, except as otherwise noted.

FARMERS' BULLETINS

Aphids on leafy vegetables. (F 2148) 18 p. 90¢.

This revision describes the kinds of aphids that attack leafy vegetables. It also discusses natural controls that hold down the aphid population such as insects that kill aphids, diseases, and weather. The bulletin tells how to control aphids by cultural practices and with insecticides.

Grasshopper control. (F 2193) 10 p. 35¢.

This slightly revised publication explains how grasshoppers may be controlled by applying insecticides, employing cul-

tural measures, regrassing field margins, and irrigating crops. Insecticides from which farmers may choose are discussed, along with application procedures and dosages for use on crops.

Wireworms on irrigated lands in the West: How to control them. (F 2220) 16 p. 90¢.

This revision describes wireworms and tells how to detect them in soil. The bulletin also discusses crop damage, habits of wireworms, and chemical and cultural methods of control.

Growing strawberries in the southeastern and Gulf Coast States. (F 2246) 33 p. 45¢.

This revised bulletin, designed for growers of strawberries in certain regions of the southeastern United States, gives a detailed account of how to plant, care for, and control pests attacking strawberries. Because of the mild climate in this region of the country, the plants grow almost all year. In addition this booklet discusses varieties to grow, how to obtain plants, how to fertilize and irrigate them.

Identification and control of honey bee diseases. (F 2255) 18 p. \$1.00

AGRICULTURE

This revised bulletin describes the common bee diseases present throughout the United States, and offers recommendations for preventing and controlling the spread of these diseases. Special sections tell the reader how and where to send dead bees or diseased samples of the comb for diagnosis, and how to compare characteristics of various brood diseases of honey bees.

HOME AND GARDEN BULLETINS

Subterranean termites, their prevention and control in buildings. (G 64) 30 p. 45¢.

This popular slightly revised publication gives full and detailed information on how to recognize termites and what to do to prevent their attack on buildings. It also discusses other insects that damage wood in buildings such as drywood termites, powder-post beetles, and carpenter ants.

Nutritive value of foods. (G 72) 40 p. \$1.05. See Bulletin of the Month

The European earwig: How to control it around the home. (G 75) Folder 50¢.

The European earwig is a nuisance in and around the home, at times in kitchen refuse and its destructiveness to plants and flowers. This revised bulletin gives steps in preparing and applying bait and directions for dusting or spraying with a chemical when bait may not be effective.

Protecting shade trees during home construction. (G 104) 8 p. 35¢.

This slightly revised illustrated bulletin describes methods of protecting trees during home construction for urban, suburban, and rural homeowners. It explains how to evaluate a tree so one may know whether a tree is worth saving or not. Ways of protecting trees from mechanical injury, grade changes, excavations, and during cleanup are explained.

Lamb in family meals. (G 124) 21 p. 35¢.

Lamb, like other meats, is rich in essential body-building protein, in iron, and in the B vitamins. This slight revision provides consumers with tips on selecting quality lamb, a guide to storing lamb, cooking lamb, and main dish recipes featuring lamb.

Shrubs, vines, and trees for summer color. (G 181) 21 p. 35¢.

This revision contains a brief description of the plants in each category that bloom between July and October. It tells how to select plants, when to plant, and how to prepare plant beds. Simple rules are outlined to follow in successfully growing shrubs, vines, and trees.

Growing bonsai. (G 206) 21 p. 40¢.

Bonsai are miniature trees grown in pots. The aim of bonsai culture is to develop a tiny tree that has all the elements of a large tree growing in a natural set-

ting. Cultivating these miniature potted trees is both an intriguing hobby, and a means of adapting a wide range of plants to specialized and decorative uses.

LEAFLETS

The house fly: How to control it. (L 390) 10 p. 35¢.

This slightly revised publication presents the latest recommendations on controlling house flies in and around homes and on farms. It tells how to eliminate breeding places and apply sanitation measures to control the flies. Instructions are given on applying space sprays, poisoned baits, and paint-on baits.

Where and how to get a farm—some questions and answers. (L 432) 8 p. 35¢.

The questions and answers in this leaflet give the reader information on where to get a farm and how to get help in financing.

The narcissus bulb fly. (L 444) 6 p. 35¢.

This revised leaflet describes the bulb fly's appearance and the type of damage it does to plant roots. Ways to detect infestation by examining the basis of bulbs is explained, as well as each stage of the bulb fly's life cycle. Chemical control through use of pesticides are explained in addition to precautions on using insecticides.

Controlling the Mexican bean beetle. (L 548) 7 p. 60¢.

This revised leaflet describes the Mexican bean beetle as the most destructive insect of beans. The leaflet discusses the beetle's development from the larvae stage to the adult stage, and methods of controlling infestations. Sprays of dusts may be used for insecticidal control.

JULY 1977

PUBLICATIONS RECEIVED DURING MAY-JUNE

BULLETIN OF THE MONTH

**Nutritive value of foods
Home and Garden Bulletin No. 72**

A table of nutritive values for household measures of commonly used foods makes up the greater part of this revised bulletin. Table 2 shows the food values of 730 commonly used foods. Nearly 200 new food items have been added, and measures and values for all foods reviewed and updated as necessary. New information is provided on the dairy products group; on the enrichment levels of white bread and rolls; and on the fatty acid content of the foods.

NOTE: Single copies of publications other than those listed **FOR SALE ONLY** may be obtained free as long as the supply permits from the Office of Communication, U.S. Department of Agriculture, Washington, D.C. 20250. Prices are given for the convenience of persons desiring to purchase these publications in quantities and for those who make frequent purchases of government publications. Remittance should be sent to the Superintendent of Documents, Government Printing Office, Washington, D.C. 20402, except as otherwise noted.

FARMERS' BULLETINS

Aphids on leafy vegetables. (F 2148) 18 p. 90¢.

This revision describes the kinds of aphids that attack leafy vegetables. It also discusses natural controls that hold down the aphid population such as insects that kill aphids, diseases, and weather. The bulletin tells how to control aphids by cultural practices and with insecticides.

Grasshopper control. (F 2193) 10 p. 35¢.

This slightly revised publication explains how grasshoppers may be controlled by applying insecticides, employing cul-

tural measures, regrassing field margins, and irrigating crops. Insecticides from which farmers may choose are discussed, along with application procedures and dosages for use on crops.

Wireworms on irrigated lands in the West: How to control them. (F 2220) 16 p. 90¢.

This revision describes wireworms and tells how to detect them in soil. The bulletin also discusses crop damage, habits of wireworms, and chemical and cultural methods of control.

Growing strawberries in the southeastern and Gulf Coast States. (F 2246) 33 p. 45¢.

This revised bulletin, designed for growers of strawberries in certain regions of the southeastern United States, gives a detailed account of how to plant, care for, and control pests attacking strawberries. Because of the mild climate in this region of the country, the plants grow almost all year. In addition this booklet discusses varieties to grow, how to obtain plants, how to fertilize and irrigate them.

Identification and control of honey bee diseases. (F 2255) 18 p. \$1.00

This revised bulletin describes the common bee diseases present throughout the United States, and offers recommendations for preventing and controlling the spread of these diseases. Special sections tell the reader how and where to send dead bees or diseased samples of the comb for diagnosis, and how to compare characteristics of various brood diseases of honey bees.

HOME AND GARDEN BULLETINS

Subterranean termites, their prevention and control in buildings. (G 64) 30 p. 45¢.

This popular slightly revised publication gives full and detailed information on how to recognize termites and what to do to prevent their attack on buildings. It also discusses other insects that damage wood in buildings such as drywood termites, powder-post beetles, and carpenter ants.

Nutritive value of foods. (G 72) 40 p. \$1.05. See Bulletin of the Month

The European earwig: How to control it around the home. (G 75) Folder 50¢.

The European earwig is a nuisance in and around the home, at times in kitchen refuse and its destructiveness to plants and flowers. This revised bulletin gives steps in preparing and applying bait and directions for dusting or spraying with a chemical when bait may not be effective.

Protecting shade trees during home construction. (G 104) 8 p. 35¢.

This slightly revised illustrated bulletin describes methods of protecting trees during home construction for urban, suburban, and rural homeowners. It explains how to evaluate a tree so one may know whether a tree is worth saving or not. Ways of protecting trees from mechanical injury, grade changes, excavations, and during cleanup are explained.

Lamb in family meals. (G 124) 21 p. 35¢.

Lamb, like other meats, is rich in essential body-building protein, in iron, and in the B vitamins. This slight revision provides consumers with tips on selecting quality lamb, a guide to storing lamb, cooking lamb, and main dish recipes featuring lamb.

Shrubs, vines, and trees for summer color. (G 181) 21 p. 35¢.

This revision contains a brief description of the plants in each category that bloom between July and October. It tells how to select plants, when to plant, and how to prepare plant beds. Simple rules are outlined to follow in successfully growing shrubs, vines, and trees.

Growing bonsai. (G 206) 21 p. 40¢.

Bonsai are miniature trees grown in pots. The aim of bonsai culture is to develop a tiny tree that has all the elements of a large tree growing in a natural set-

ting. Cultivating these miniature potted trees is both an intriguing hobby, and a means of adapting a wide range of plants to specialized and decorative uses.

LEAFLETS

The house fly: How to control it. (L 390) 10 p. 35¢.

This slightly revised publication presents the latest recommendations on controlling house flies in and around homes and on farms. It tells how to eliminate breeding places and apply sanitation measures to control the flies. Instructions are given on applying space sprays, poisoned baits, and paint-on baits.

Where and how to get a farm—some questions and answers. (L 432) 8 p. 35¢.

The questions and answers in this leaflet give the reader information on where to get a farm and how to get help in financing.

The narcissus bulb fly. (L 444) 6 p. 35¢.

This revised leaflet describes the bulb fly's appearance and the type of damage it does to plant roots. Ways to detect infestation by examining the basis of bulbs is explained, as well as each stage of the bulb fly's life cycle. Chemical control through use of pesticides are explained in addition to precautions on using insecticides.

Controlling the Mexican bean beetle. (L 548) 7 p. 60¢.

This revised leaflet describes the Mexican bean beetle as the most destructive insect of beans. The leaflet discusses the beetle's development from the larvae stage to the adult stage, and methods of controlling infestations. Sprays of dusts may be used for insecticidal control.

BIMONTHLY LIST OF PUBLICATIONS AND VISUALS

UNITED STATES DEPARTMENT OF AGRICULTURE
OFFICE OF COMMUNICATION

NOVEMBER 1977

PUBLICATIONS RECEIVED DURING SEPTEMBER-OCTOBER

BULLETINS OF THE MONTH

Beef slaughtering, cutting, preserving, and cooking on the farm Farmers' Bulletin No. 2263

This well illustrated bulletin tells about selection and care of animals before slaughter, preparing for slaughter, slaughter, and chilling and cutting the carcass. A section on further processing and meat cookery is also included.

Solar heating for milking parlors Farmers' Bulletin No. 2266

Solar-heating systems are well suited to the requirements of dairy farms for large amounts of hot water and for low-temperature heat. This new publication discusses solar-heating systems, which are becoming increasingly practical and economical. It specifically explains principles of solar heat collection, gives design guidelines for systems, and discusses other factors that a dairy farmer should consider to conserve energy and reduce energy costs.

NOTE: Single copies of publications other than those listed FOR SALE ONLY may be obtained free as long as the supply permits from the Office of Communication, U.S. Department of Agriculture, Washington, D.C. 20250. Prices are given for the convenience of persons desiring to purchase these publications in quantities and for those who make frequent purchases of government publications. Remittances should be sent to the Superintendent of Documents, Government Printing Office, Washington, D.C. 20402, except as otherwise noted.

FARMERS' BULLETINS

Poison ivy, poison oak, and poison sumac: Identification, precautions, eradication. (F 1972) 16 p. 35¢.

This slightly revised bulletin discusses the various kinds of poison ivy, poison oak, and poison sumac; precautions against and treatment for these poisons; and ways to eradicate the plants.

Beef slaughtering, cutting, preserving, and cooking on the farm. (F 2263) 68 p. \$2.00.

See Bulletin of the Month

Solar heating for milking parlors. (F 2266) 15 p.

HOME AND GARDEN BULLETINS

Wood decay in houses, how to prevent and control it. (G 73) 17 p. 35¢.

This slight revision tells homeowners and builders some measures they can take to prevent or control wood decay in houses. It gives instructions for protecting woodwork that is in contact with the ground and for protecting the parts of the house that are exposed to rain. Instructions for treating wood with preservatives are included.

Growing camellias. (G 86) 12 p. 70¢.

This slightly revised bulletin describes three species of camellias in general cultivation in the United States, and discusses

how to select, plant, and care for these shrubs. Information on ways to protect the plants against insects and diseases is also included.

Controlling household pests. (G 96) 30 p. 50¢.

This slightly revised bulletin describes major household pests, their habits, breeding places, and the damage they cause. It tells the housekeeper how to control these pests and emphasizes the safe use of pesticides.

How to buy beef roasts. (G 146) 15 p. 35¢.

This slightly revised bulletin will help you choose beef roasts. It also describes and illustrates the many kinds of beef roasts ranging from rib roasts to arm pot roasts.

Growing pansies. (G 149) 7 p. 35¢.

This slight revision describes kinds of pansies, outlines instructions for planting and caring for them, and gives information on the diseases and insects that injure the plants.

Summer flowering bulbs. (G 151) 16 p. 35¢.

This slight revision describes the various kinds of summer flowering bulbs, how to select, plant, and care for them, and how to grow them indoors. Fully illustrated.

How to buy poultry. (G 157) Folder 35¢.

This slightly revised bulletin explains and illustrates what is meant by Grade A and Grade B shields on poultry. It also explains how to select poultry by class (age), and it lists suitable cooking methods for various kinds of young and mature birds.

Pork in family meals: A guide for consumers. (G 160) 33 p. \$1.30

Roast pork, bacon, and ham are examples of some of the good eating provided by pork. This revision will help you identify fresh and cured pork cuts in retail markets. It gives tips on how to select pork of good quality, how to estimate quantity to buy and how to store it properly. Cooking pork and recipes featuring pork are also included.

Growing ground covers. (G 175) 16 p.

This slight revision lists the most common plants that are grown as ground covers and describes their growing characteristics; includes information on planting, caring of plants, and propagation.

Selecting and financing a home. (G 182) 24 p. 35¢.

This revised bulletin provides information to help families select and finance a home that will fit their needs, goals, and income. It discusses renting versus buying, shopping for a home and judging a neighborhood, types and costs of mortgage loans, closing procedures and costs, and fitting housing costs into a budget.

Growing ornamentals in urban gardens. (G 188) 22 p. 35¢.

This slight revision gives specific infor-

mation on the kinds of plants that will grow in an urban environment. The sections on fertilizing, watering, and mulching give valuable, essential facts that can be used by all home gardeners. Information on poor growing conditions, night lighting, and air pollution problems is also included.

Transplanting ornamental trees and shrubs. (G 192) 12 p. 70¢.

This revision discusses many things that can be done to insure successful transplanting. It tells how healthy and unhealthy plants respond to transplanting, the best time to transplant deciduous trees and shrubs, how the site for transplanting affects growth, how to dig and prepare the soil, and protecting plants from sun and wind damage.

LEAFLETS

Preventing greenbug outbreaks. (L 309) 11 p. 35¢.

The greenbug, sometimes called the spring grain aphid, is a pest of small grains and sorghum in the Central and Southeastern States. This leaflet describes the four known types of greenbug, the damage they can do, and control measures. This revised leaflet gives the details of each type of control—natural, cultural, and pesticides.

How to buy a Christmas Tree. (G 189) 11p.

This slightly revised bulletin provides useful tips in choosing a Christmas tree that is "just right." It is easier if you know what species you are looking for, the different features that indicate a good tree, and how to select and maintain freshness.

Keeping a cow. (L 536) 8p. 70¢.

This revision tells how to buy a cow, how to care for her, how to milk her, caring for the milk; and how you can make good butter at home from sweet or slightly sour cream.
